Second Phase Pool Upgrade – Lap Pool

Talofa lava,

As part of our continued investment in Taumeasina Island Resort, we will be undertaking the second phase of upgrade works to our Lap Pool during November 2026.

The works have been carefully scheduled during one of the resort's quieter periods to minimise any impact on our guests.

The planned upgrade works will refresh the Lap Pool finishes, further enhancing the appearance and functionality of the pool for our guests.

The Lap Pool will be temporarily closed from 2 November 2026, with works expected to be completed during the final week of November and, at the very latest, by 1 December 2026.

During this period:

- **Resort Leisure Pool:** The resort's leisure pool will remain fully operational, with the surrounding decking and sunloungers available for guest use throughout the works.
- **Beach & Ocean Activities:** Beach access and all ocean activities will continue as normal.
- **Other Resort Facilities:** All other resort facilities and services will remain fully operational.

Upgrade works will be carried out between 9:00 am and 5:00 pm, with our team and contractors taking all reasonable measures to minimise any impact on the guest experience.

We appreciate your understanding while these improvements are completed and look forward to unveiling the upgraded Lap Pool upon completion.

Should you have any questions regarding an existing or upcoming booking during this period, please do not hesitate to contact our team.

Fa'afetai tele lava,

Tuiataga Nathan Bucknall
